

## Eco-Smart donates a New Solar Coach Light to the "green" demo at Sarasota City Hall

Eco-Smart has donated the latest addition to the sustainable "green" display for the City of Sarasota, at City Hall. A New Solar Coach Light has been installed on the same pole that holds a Bat-house, with no need for special wiring or destructive modification of the existing features. The display at City Hall also includes rain barrels on the south side on 1st Street and eco-friendly landscaping for Florida Yards throughout the grounds. Energy efficient LEDs and CFLs are used at City Hall as well.

Wow! Just put up a pole and top with a Solar Coach Light. It is completely self contained. Solar cells charge a sealed 12 volt battery (like on a motorcycle) with several days of backup power. Efficient LED light comes on at dusk and shuts off at dawn automatically.

**What a cost & resource saving item!** No wiring needed! That will save far more than the price of the coach lights! Ideal for residences and neighborhoods, commercial buildings, and parking areas.

Our thanks to Michele Mician who has spearheaded the display, and to Eric Patro, maintenance and staff at City Hall for saving resources and showing residents a better way.
