

Coconut Palm Flooring

Coconut Palm flooring comes from plantation grown coconut palms, which grow in abundance throughout much of the world. Palms produce nuts for up to 80 years, and then non-production palms are removed and replaced. Coconut palm lumber can vary greatly in color and density. Our Coconut Palm flooring is made only from the hard, dark palm. It has a beautiful, rich color and unique texture. It is also treated with a special hot and cold bath, increasing stability in response to dry or humid indoor environments.
