# STRUCTURAL CONCRETE FORMS™

- The **STRENGTH** of Cast-in-Place Concrete
- The **SPEED** of Panelized Stay-in-Place Forms
- The Advantages of **GREEN CONSTRUCTION**

EBS Structural Concrete Forms are panelized and custom built offsite for each project. These stay-in-place forms are then shipped, erected, and filled with concrete.

Structures may reach 30' elevations without a floor load. Higher elevations are possible. Multiple story structures can be built without additional steel frame.

EBS Structural Concrete Forms™ offers the speed and savings of pre-cast with the strength of cast in place concrete.

EBS is a Full Service Company

- Architectural and Technical Support
- Engineering and Structural Design
- Precision Manufacturing
- Fast and Dependable Installation

One of our 7 man crews can raise 5,000 sq ft of wall per day.

EBS Structural Concrete Forms provides you with:

- Faster construction times
- Green construction
- Lower insurance premiums
- Reduced litigation risk (mold, sound)
- Sales differentiation
- Reduced maintenance cost

EBS Structural Concrete Forms™ are compatible with any slab, any floor, any roof configuration

EBS' structures are Hurricane Resistant, Tornado Resistant, and Anti-seismic.
