0.8 Gallon Ultra High Efficiency Toilet

The world's only 0.8 GPF toilet!

The revolutionary toilet that saves more water than any other on the market with maximum performance and maximum power.

How It Works

With its groundbreaking technology, the 0.8 Gallon Ultra High Efficiency Toilet delivers a powerful, effective one-time flush. With a combination of air and water working in unison for an ideal filling and flushing system, this toilet provides a larger water spot to better clear waste with minimal water use. The system is not only capable of functioning efficiently at varying water pressure levels, but it has no expensive parts to replace, further saving the customer money and reducing materials use. Completing its superior engineering, the modern, compact design makes it ideal for new construction and retrofitting projects.

Stealth™ Ultra High-Efficiency Toilet

Key Features

- Powerful flush delivered with a patented flush chamber and air transfer system.
- One flush thoroughly evacuates the bowl every time - no need for double flushing or dual-flush systems like many "high efficiency" toilets.
- Air pressure in the trap way causes the water to fill at a high level, delivering a larger water surface.
- Low Friction engineered ceramic bowl delivers a cleaner and more reliable flush with more water in the bowl.
- Fully glazed trap-way ensures long dependable life.

What it saves

The Stealth™ toilet's water and utility bill savings translate to impressive, real numbers. At a flush rate that saves 37% more water than a standard HET, this WaterSense®-certified toilet saves up to 20,000 gallons and \$101 per year* with regular use and up to 200,000 gallons and \$1,013 in its lifetime*!

Annual water savings based on 3.5 GPF Toilet with 4 people/5 flushes per day.
