

An Inside Look

A look inside the purification process reveals how pure, safe, chemical free water is available from the air.

- Air is drawn in through the anti-bacterial/fungus air filter. Air-borne particles are trapped there. As the cleaned air exits the machine the water particles are collected on the condenser.
- The condensed water is then routed through a nanosterilization center and placed in the storage tank.
- Water from the storage tank is then processed through a pair of carbon filters, Reverse Osmosis filter and finally a bio ceramic filter sequentially.
- Water is then routed through an Ultra Violet filter stage and placed in either the cold or hot holding tank.
- When demanded the water from the cold tank is then processed once again through yet another Ultra Violet filter and then dispensed.
- When hot water is demanded, the water in the storage tank is heated to 165 - 199°F ensuring the elimination of any bacteria and then dispensed.

Operating Information

Voltage:	AC115V
Frequency:	60Hz
Operating Watt:.....	495W
Heating Watt:.....	500W
Refrigerant:.....	R22/R407c
Prod. Cap:	7.5gal/24hr
Storage Cap:	3 gal
Temp. Range:	37 - 199°F
Hum. Range:	35% - 95%
Size:	15.4"X15.6"X39.4"
Weight:	91lbs.

ISO 9001:2000 Certified Manufacturer

Atmospheric Water Generator

**No Bottles
or External Water
Source Required!**

**Create Fresh, Pure,
Great Tasting Water
From Air!**

Perfect for Office ...

... or Home!

**Anywhere, Any Time ...
Pure Water is Preferred!**

The Facts

Converting Air to Pure Water

The AWG System is a state of the art air to water generator which removes water vapor from the air and purifies it for drinking.

Through the use of Reverse Osmosis and Ultra Violet technology the purest drinking water available is produced without the use of any chemicals, while the Anti-bacterial/Fungus air filter also cleans the air in the office or home.

Operating indoors, the AWG System creates up to 7.5 gallons of drinking water in a 24 hour period, and can store 3 gallons onboard.

User adjustable settings allow water to be dispensed cold at 50 - 37°F and hot at 165 - 199°F, perfect for instant soups, coffee, tea and other food products.

Our State of the Art Atmospheric Water Generator is the most sophisticated Hi-Tec water generator on the market today and although it may sound new to you this incredible machine has been performing worldwide for over 7 years with unsurpassed reliability.

The Features

The AWG-1 is designed to be used anywhere. The sleek silhouette fits pleasingly into any office or home decor, while the durable chassis and locking casters make the AWG-1 perfect to move from office to warehouse or kitchen to garage.

- Digital Display - Offers easy to read graphics and monitoring of all working components and settings.
- Electronic Sensors - Found on all critical components alerting customer to irregularities.
- Energy Efficient - Automatically shuts off when storage capacity has been achieved.
- Anti-Bacterial/Fungus Air Filter - Removes airborne particles and returns clean air into the surroundings.
- 7-Stage Purification System - Guarantees pure, safe, chemical free drinking water.
- Quiet Operation - Lower db levels than standard water coolers.
- Easy Maintenance - All filters are equipped with quick disconnect connectors.
- Hybrid - In areas of low humidity can be hooked up to municipal water.

The Positives

Pure, safe, chemical free water has never before been so affordable. At approximately 15¢ a gallon the cost savings are astronomical.

- No External Water Source (plumbing)
- No Bottles to Store (full or empty)
- No Wasted Water
- No Deliveries
- No Security Risks
- Pure, Chemical Free Water
- Portable
- Removes Particles from the Air
- Saves Money (40-60% over bottled water)
- Oxygenated Water (More Dissolved Oxygen than most other waters for faster assimilation and hydration)

"Think Green. Think Sustainability."

Water is essential to life ... Pure water is essential to a healthy life.
