

LED Retrofit for HID Lighting

HTS Series

HTS-8

Designed for the service station industry and parking lots. Its superior heat management and compact design make it ideal for retrofitting existing fixtures commonly found in these environments. This light board draws 88 watts to produce and equivalent of a 400 watt bulb. Uses 36 Hi Power Cool White LED's. 10 x 7 ¼ x 1 ¾

HTS-9

Designed for wall pack and street lighting retrofits. Its superior heat management and compact design make it ideal for retrofitting existing fixtures commonly found in these environments. This light board draws only 59 watts to produce the equivalent of 200w MH. Uses 24 Hi Power Cool White LED's. 7 ¼ x 7 ¼ x 1 ¾

HTS-9a

Designed for wall pack and decorative lighting retrofits. Its size and low wattage make it ideal for retrofitting existing fixtures commonly found in these environments. This light board draws 30 watts to produce the equivalent of a 100w MH. Uses 12 Hi Power Cool White LED's. 7 ¼ x 3 ¾ x 1 ¾
