

Eco-Panels Product Overview

Eco-Panels manufactures the most advanced, integrated and rapidly assembled structural panel system on the market today. With a wide range of sidings, Eco-Panels can provide superior insulation and structural strength installed faster than traditional building systems.

Product Benefits

| | |
|----------------------------|---|
| Cost Savings | Time is money, and with our pre-engineered & rapidly assembled panels we can often speed your enclosure by 3 to 5 times |
| Energy Savings | With panels ranging from R18 to R60+, we can reduce your HVAC energy consumption by more than 70% |
| Structural Strength | Our PUR foam core panels with structural siding is significantly stronger than traditional building systems |
| Seismic, Hurricanes | Where two walls come together is often the weakest part of a structure. Our patent pending single piece corner panels virtually eliminate this weak juncture. |
| Versatility | Sidings options include fiberglass, fiber cement, steel, finished wood grades (interior & exterior), OSB, MgO, various resin composites, fire-rated gypsum, etc. |
| Sound Attenuation | Absence of rigid structural members bisecting the panel eliminates much of the sound conductance of normal construction |
| Durability | Long term maintenance on cheap construction is often an expensive part of building ownership. Our structural panels will protect the building envelope against tenant abuse far better than traditional wall systems. |

Commercial Case Study:

10-Plex Movie Theater Mt. Airy, NC (3rd in series of 3 theaters)

Scheduled dry-in time: 45 days Actual time: 9 days

Exterior Siding – GP Densglass Gold®, Interior Siding – US Gypsum’s FibeRock®

Only panel brand rated to DIVIDE THEATERS in George Lucas’s brand of THX Theaters
