Dear Nonnie Chrystal

Florida's Showcase Green Envirohome is the first residence in Brevard County Florida to have a Graywater Reuse System installed for in home use. Brevard County's Permitting and Enforcement Department approved this system on April 24, 2007 based on the 2004 FBC plumbing code for gray water recycling systems. The system has been approved by multiple counties in Florida as well as meeting ANSI standards and IAPMO certification. I am unsure whether the system has been installed in other areas of Florida or if Brevard County is the first. I also see that Florida Water Star is one of your partners as well as many others. Good luck on this project.

Terry W. Talbert
